## Protective Face Mask - London

### Key Features

Adult Protective Face mask London

GCF/MA001 & GCF/MA002

- Reusable consumer face masks [ this is a non-medical / non-N95 item]
- 3-ply cotton-blend
  - Inner layer soft 100% cotton to the face (Oeko-tex 100)
  - Middle layer non-woven certified filter (PN-EN689)
  - Outer layer, durable non-woven polypropylene for increased filtration and protection
- Elastic straps to hold securely and comfortably
- Size: Adult (Children's are a separate model #)
- Sold blank or printed
  - Printed fabric masks should be hand washed in 40°C and ironed on the inside only
  - Unprinted fabric masks can be hand washed at 60°C
- Color: White (black and other colors in development)
- Made in Europe by a professional workwear company with over 20 years-experience and WRAP certification.

Reusable consumer face masks made from a 3-ply filtering fabric with a convenient elastic band. The inner layer is OEKO-TEX certified 100% cotton soft fabric on the skin. The middle layer is a filter layer (PN-EN 689) which filters dust and other particulate matter, with a filtration capacity of 96% at 6h exposure. The outer layer is a durable non-woven polypropylene for increased filtration of small particles and added protection. "London" is made from a single flat fabric panel, which is both comfortable and easy to print.

This item is not intended as a Medical Device, and should not be used in surgical or clinical settings. Our masks, like other fabric face masks do not protect from corona-virus. However, there are studies that show they do help reduce the spread of disease by acting as a blockade from the user touching their own mouth and then inadvertently spreading to others.

3-ply structure gives better protection compared to 1-2 layer solutions
